What is Fractional laser?

Fractional laser is the newest and hottest laser technique in the last two years and also attracts the most attention of hairdressing technology all over the world. It is a micro-invasive treatment between invasive and noninvasive. Fractional laser was called Fractional Photothermolysis with English theory, which was first expressed by Dr. Rox Anderson, a laser-medical specialist of Harvard University, in 2004. Immediately, that was agreed by specialist all over the world and applied to the clinical treatment rapidly.

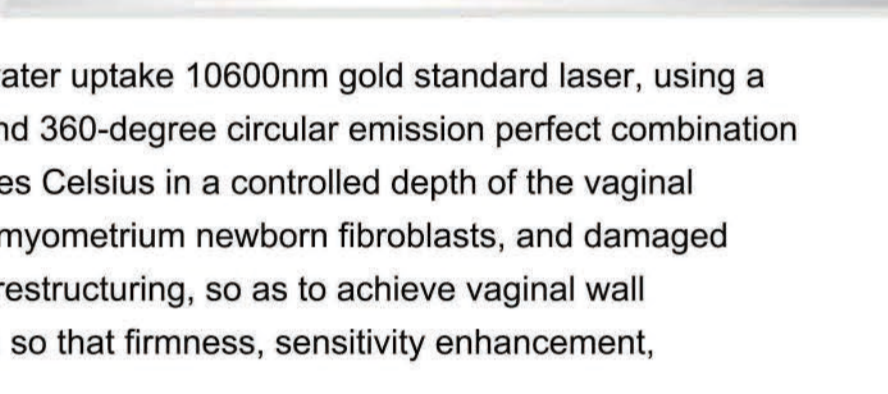

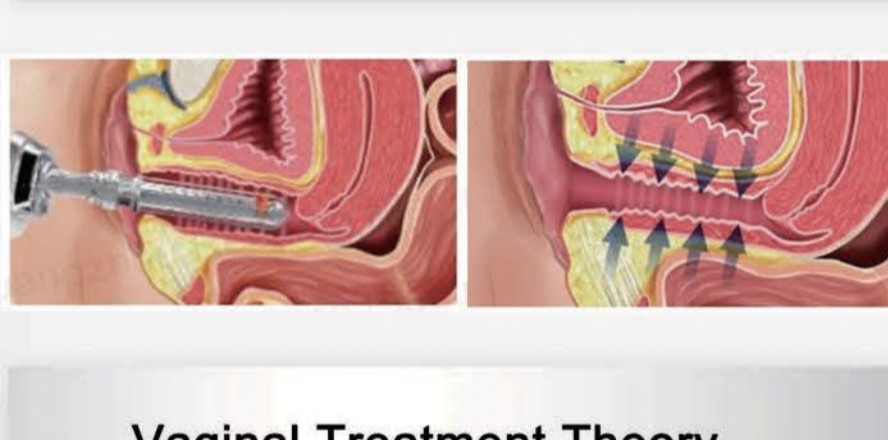

Fractional Photothermolysis is stretch theory of traditional Selective Photothermolysis. Not only the rapid and remarkable effect with invasive therapy, but also the advantage of less side effects and short recovery time with noninvasive.

Treatment Theory:

Fractional ablative CO2 resurfacing delivers 10600nm laser in fractional manner into the skin while leaving the untreated surrounding areas intact. Laser creates microscopic thermal dot on surface and performs within tissues, offering improve skin tightening, age spots, fine lines, acne scars, stretch marks removal and vulva rejuvenation. The untreated tissue helps to accelerate the healing process and rejuvenate the skin by promoting microcirculation and new cell genesis.

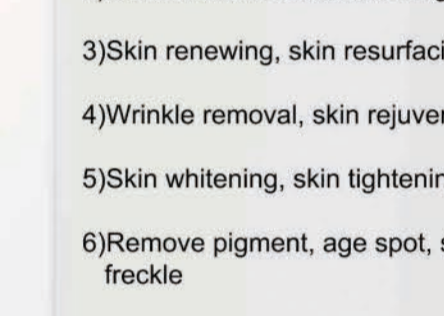

Action histologies

Vaginal Treatment Theory

Vaginal tightening laser is the use of water uptake 10600nm gold standard laser, using a three-dimensional lattice technology and 360-degree circular emission perfect combination of technology, to produce 50-70 degrees Celsius in a controlled depth of the vaginal mucosa, stimulate lamina propria and myometrium, newborn fibroblasts, and damaged collagen fibers, elastic fibers, such as restructuring, new, to achieve a well thickening and tightening of the vagina so that firmness, sensitivity enhancement, vagina tight as ever.

Tighten vagina; Clean the vagina; Moist vagina; Pink vagina.

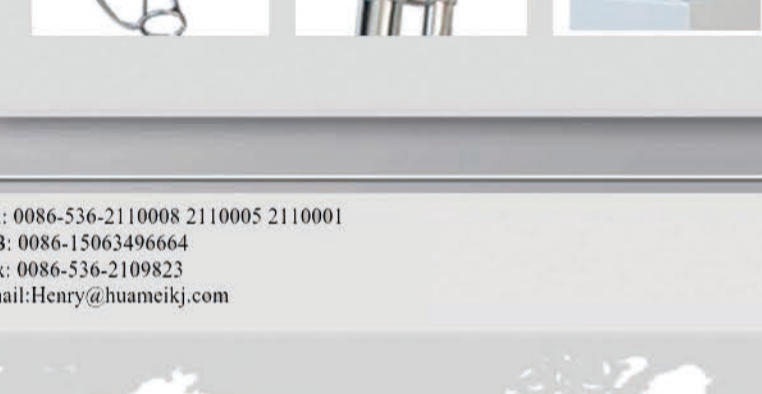

Applications

- 1) Acne removal, Scar removal, acne scar removal, stretch marks removal
- 2) Smooth burnt scars and surgery scars
- 3) Skin renewing, skin resurfacing
- 4) Wrinkle removal, skin rejuvenation
- 5) Skin whitening, skin tightening
- 6) Remove pigment, age spot, sun spot, freckle
- 7) Sun damage recovery
- 8) Improving texture tone and pore size
- 9) vaginal tightening, vaginal skin lifting

HM-LT200

Technical Specifications

Laser Type	Carbon Dioxide Fractional Laser
Laser wavelength	10600nm
Laser power	up to 30w(Optional)
Light system	7 joint arms
Pulse Duration	0.1-10ms
mode	Fractional laser/Laser unfractonated/Gynae
Distance	0.2-2.6mm
Interface Colorful Touch Screen	10inch
Scanning	Midsplip, Random, Normal
Refrigerating system	Air cooling
Input Power	AC 230V±10% 50Hz/ AC 110V±10% 60Hz

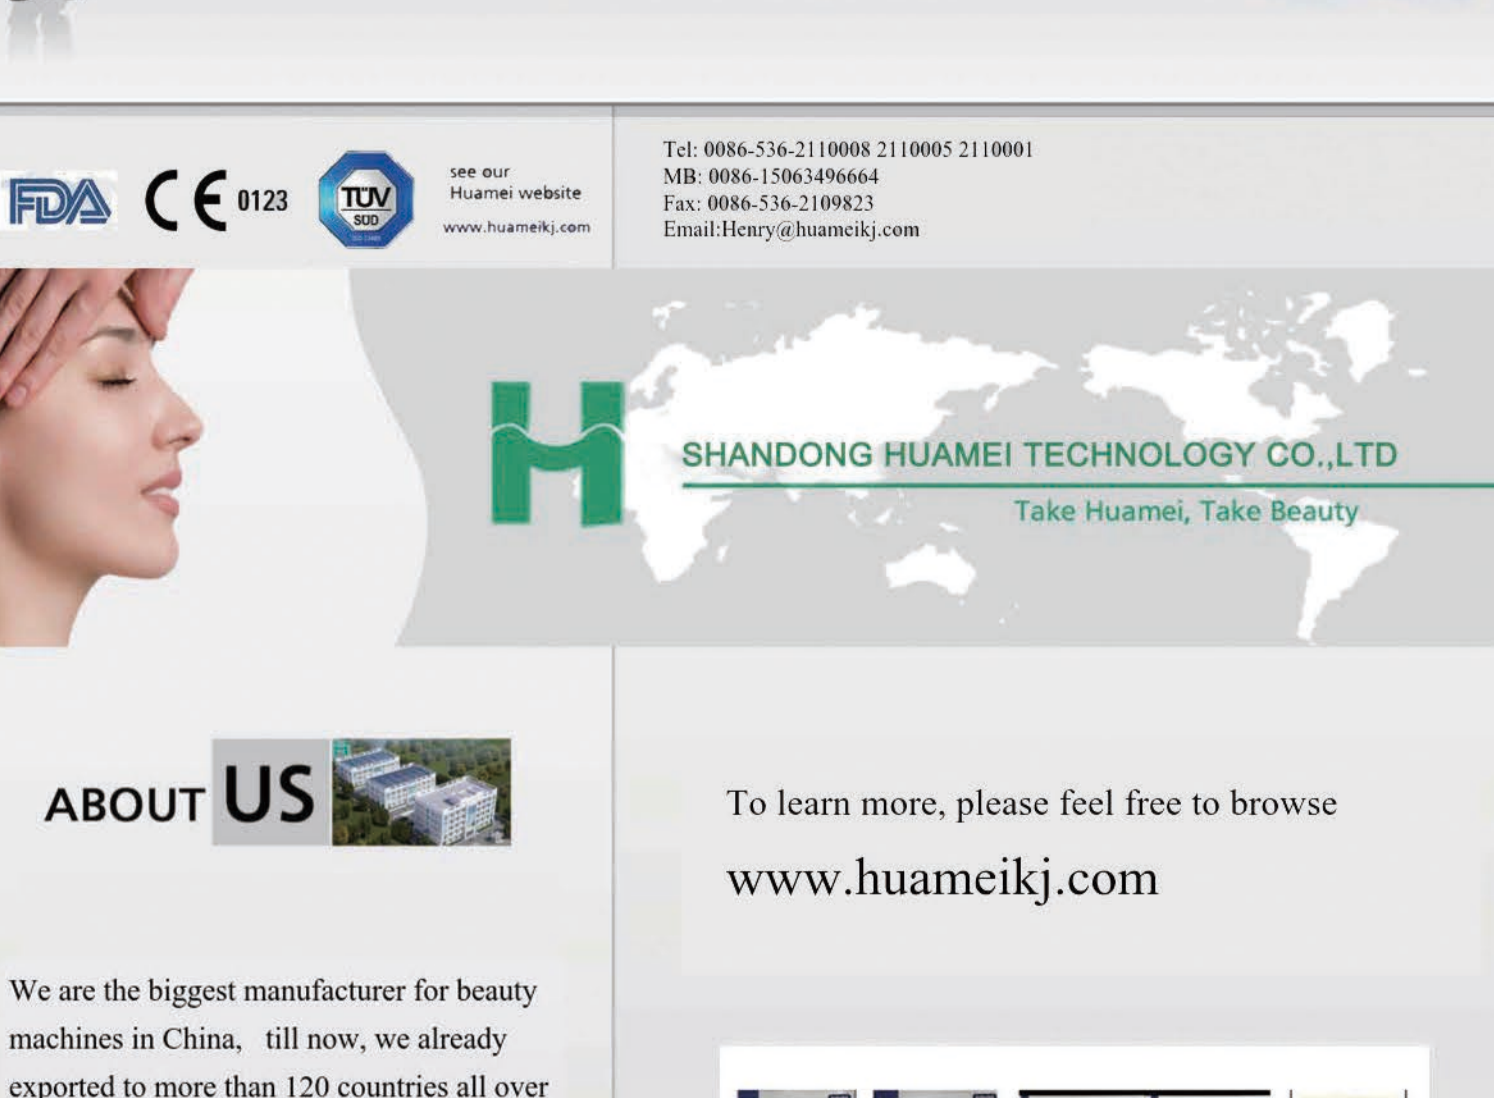

1. Intelligence
2. Easy to operate
3. Stable operation
4. Simple and beautiful

Intelligent system

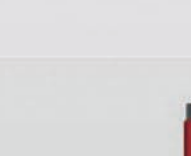

Humanized LCD operation System Design, Faster in reaction, More convenient in operation, More beautiful in outlook

USB updating technology: Add you company logo and Cartoon on the LCD screen

Leasing software program: No need card, Only a phone call can solve the problem of RENT business.

ABOUT US

We are the biggest manufacturer for beauty machines in China, till now, we already exported to more than 120 countries all over the world and got the sound reputation. Our beauty machines has been approved by CE0123, ISO13485 approval, FDA approval, SFDA.

We got the exclusive agent in Germany, Spain, Australia, Iran, Turkey, Canada, Portugal, etc
